

Ischemic Heart Disease (IHD)

The resident will be able to:

1. Describe different clinical presentations of IHD
2. Perform a targeted History and Physical
3. Select appropriate Investigations for the potential IHD patient, recognizing the advantages and especially the limitations (sensitivity/specificity) of tests in various IHD presentations
4. Explain the benefits of lifestyle modification and implement supportive strategies
5. Prescribe appropriate medications for secondary prevention
6. Plan appropriate follow-up and supervision

Feedback and suggested modifications for these objectives are encouraged after each session. Please direct your comments to your site Curriculum Coordinator.
