

Sexually Transmitted Infections

At the completion of the seminar the resident will be able to:

1. Use appropriate technique and correctly interpret the appropriate investigations to screen for and diagnose STIs.
2. Counsel patients about prevention and complications of STIs.
3. Treat STIs appropriately both empirically and based on laboratory confirmation.
4. Explain the Public Health consequences of STIs including contact tracing and duty to report.
5. Differentiate STIs from common anatomical variants.

Feedback and suggested modifications for these objectives are encouraged after each session. Please direct your comments to your site Curriculum Coordinator.
