

Thyroid Disorders

The Resident on completion of this presentation should be able to:

1. Describe the clinical presentation of Hypothyroidism, Hyperthyroidism and Thyroid nodules
2. Initiate appropriate office based investigations of each
3. Interpret the results of the investigation
4. Understand thyroid physiology (TSH, T4, T3)
5. Understand the significance of hot and cold nodules
6. Initiate appropriate management of each including when to refer and when to prescribe
7. Know the appropriate follow

Feedback and suggested modifications for these objectives are encouraged after each session. Please direct your comments to your site Curriculum Coordinator.
