

ROUNDS OBJECTIVES

April 3, 2018

Dr. Natalie Parks

Division of Neurology

“Advances in Treatment of Multiple Sclerosis”

Objectives:

To be able to answer the following:

- Is multiple sclerosis common in our region?
- What are the clinical symptoms of multiple sclerosis?
- How is multiple sclerosis diagnosed?
- What is the goal in multiple sclerosis management?
- Are there lifestyle factors that influence multiple sclerosis?
- What are therapeutic strategies for multiple sclerosis?

April 10, 2018

Dr. Stephen Workman

Division of General Internal Medicine

Topic: Goals of Care

Objectives:

- TBA

April 17, 2018

Dr. Amanda Vinson

Division of Nephrology

“Donor-Recipient Selection in Kidney Transplant: Managing a Limited Resource”

Objectives:

- The benefits of kidney transplantation
- Local and national kidney transplant data
- The practicalities of kidney transplant in Atlantic Canada
- Current donor-recipient selection algorithms
- How local research is challenging the current donor-recipient matching standard (immunologic versus non-immunologic matching)

ROUNDS OBJECTIVES

April 24, 2018

Dr. Marcel Behr

Division of Infectious Diseases – TJ Marrie Lecture

“Genomic Epidemiology of a TB Outbreak (We Need a TB Vaccine)”

Objectives:

- To detail how conventional epidemiologic methods were unable to resolve a TB outbreak
- To detail how bacterial genomics, on its own, was unable to resolve a TB outbreak
- To show how the combination of genomics and epidemiology provided insights
- To share generalizable insights that might extend beyond TB.
