

# GRAND ROUNDS

Tuesdays, 0800-0900

Via Zoom

**January 5, 2021**

**8:00-9:00**

**Title:** Patients at high-risk of thrombotic events: Dual antiplatelet therapy vs. Dual antithrombotic therapy

**Presenter:** Wael Sumaya  
(Division of Cardiology)

**Objectives:**

- Review the evidence for prolonged dual antiplatelet therapy in high-risk patients
- Review the evidence for dual antithrombotic therapy (aspirin + rivaroxaban 2.5 mg BID) in high-risk patients
- Provide an algorithm to aid the decision-making process and identify high-risk patients where intensive antithrombotic therapy may be required

**Evaluation:**

Complete evaluation on line
