

ROUNDS OBJECTIVES

March 5

Amanda Tinning, NP, and Dr. Ashley Miller

“The Transitional Heart Failure Clinic: A Collaborative, Palliative Approach to Chronic Disease Management in the Community”

Objectives:

- Review the history and evolution of the Transitional Heart Failure Clinic.
- Outline the progressive nature of heart failure, recognizing the impact of frailty in this population.
- Outline the palliative approach to chronic disease management, including the importance of an early focus on goals of care and symptom-driven management.
- Highlight the current enablers and barriers to death at home.
- Share lessons emerging from our first year of intake and explore their broad application to chronic disease management across diagnoses.

March 12

Dr. Elana Murphy

“Complications of Immunosuppression in Rheumatic Disease: A Case and Literature Review”

Objectives:

- Review an M&M case applicable to Internal Medicine.
- Recognize a potential infectious complication of immunosuppression.
- Review the literature regarding prophylaxis against this infection in rheumatic disease.
