FACULTY OF MEDICINE
Department of Medicine

Tuesday, November 15, 2022

8:00 - 9:00

Title: Cognitive Challenges for Clinical Decision Making

Presenter: Dr. Pat Croskerry
Special Rounds

Objectives:

Upon completion of this activity, participants will be able to:

- To emphasize that along with the acquisition of medical knowledge, it is especially important to consider how we think about that knowledge
- The development of well-calibrated rationality in clinical reasoning and decision making is a most important clinical skill
- A core axiom of the current ‘cognitive’ approach in medical education is that the acquisition of critical thinking skills can be achieved through coaching and teaching, preferably starting in undergraduate medical education.

Complete attendance and evaluation online at:
