

## Requirements for transfer to PhD

- 1. Must have completed PHAC5405;**
  - If no previous pharmacology courses, need to complete PHAC5406 and/or PHAC5409 before PHAC5405 to be eligible
- 2. Student must have been in the program for at least 1 year;**
  - timeline may vary as to strategically not interfere with current MSc scholarships, or adjust for potential PhD scholarships
- 3. Discuss possibility of transfer with supervisor first, and if both agree, the student provides a short PhD program proposal to advisory committee (with major research milestones) at meeting prior to proposed transfer semester.**
  - usually Nov. meeting, but can set up an additional advisory meeting in August for a Sept. transfer, for example
  - Advisory committee assesses feasibility of program and recommends transfer or not
