The Northeastern Section and its' Foundation are dedicated to furthering urologic research. The **Research and Education Fund** was initiated in 1995 by Searle Canada and Searle USA. The purpose of this fund is to assure the membership of the NSAUA continued excellence in research and educational activity within our Section. Through the Section's Foundation and the Research and Education Fund, the Section is able to provide many opportunities for young Residents such as financial assistance to participate in our Annual Meeting and the opportunity to win Research Grant awards, such as the **Young Investigator Awards** and the **Resident Prize Essay Contest**.

Young Investigator Awards - Scholarship Program

The NSAUA Scholarship Program was established in 1998 to provide financial scholarships to support research and educational projects. These Young Investigator Awards provide financial assistance to a researcher in basic or clinical sciences related to urology, and to acquiring, developing or improving his or her knowledge and skills in a specific aspect of the specialty.

The program currently offers up to two scholarship awards annually, of \$30,000.

Submit [Grant Application](#) by August 18, 2017.

[Resident Prize Essay Contest](#)

The Resident Prize Essay Award is supported by the Section's Foundation and Research and Education fund. All residents and medical students from the Section's 16 Urology Training Programs are invited to enter their best basic science or clinical research project for consideration. Awards are presented at the Annual Meeting each year. **Entries are limited to one (1) Basic Science manuscript and one (1) Clinical research manuscript per resident. Deadline to enter is July 5, 2017.**

- First Prize: \$750 Cash Award
- Second Prize: \$500 Cash Award
- Third Prize: \$250 Cash Award

In addition to cash prize, winners are given 7 minutes to present their research during a plenary session at the annual meeting in Savannah, GA.

Dalhousie

<https://medicine.dal.ca/departments/core-units/postgraduate/calendar/fellowships-scholarships.html>

Samuel R. McLaughlin Fellowship

In 2001, the Samuel R. McLaughlin Foundation donated \$500,000 to Dalhousie as a final gift before closing its doors permanently. The purpose of the fund is to support medical fellowships, medical training or research or other medical education programs.

Candidates must be Canadian citizens or landed immigrants and currently registered with Dalhousie University in a residency training program. Preference will be given to those who'll be studying at an institute other than their own. Selection will be made by the PGME Scholarship Committee.

Deadline for submission: January 19, 2017

Killam Postgraduate Medical Scholarships

These scholarships were established by the late Mrs. Izaak Walton Killam, and are awarded to postgraduate students in their third, fourth or fifth year of training in one of Dalhousie Medical School's clinical departments.

Selection by the Faculty Awards Committee is based on the recommendation of the department head that the candidate is likely to contribute to the advancement of learning or to win distinction in his/her specialty and could be recommended for appointment to the faculty of a medical school on completion of training.

Deadline for submission: January 19, 2017

Research in Motion (RIM) – for Dal Medical Students

<https://medicine.dal.ca/research-dal-med/programs/rim.html>

Research in Medicine is a mandatory program that introduces Dalhousie medical students to research from the start of their medical training. From first year on, it fosters their research and critical thinking abilities as they complete independent research projects.

Studentship funding is available to all participants of Research in Medicine, thanks to the generosity of donors who have established endowment funds for medical and research education, through Dalhousie University, Dalhousie Medical School, various departments within the medical school and Dalhousie Medical Research Foundation. Studentships provide a stipend of \$5,000 to be paid to the medical student over the summer months.

CUA-CUOG Astellas research grant program

The primary focus of the Program is to support research in the area of functional urology such as over active bladder (OAB), lower urinary tract symptoms (LUTS), pelvic floor disorders, voiding dysfunctions, neurogenic bladder, among others. The secondary focus is to support other urological areas, with the exception of urologic cancer (these proposal should be submitted to the CUA-CUOG Astellas research grant program), such as community-based research, practice improvement, multidisciplinary management, basic research, etc.

deadline Feb 28, 2017

Amount \$50,000 CND

The objective of the CUA-Pfizer Urology Resident Grant Program is to support peer-reviewed resident research or care enhancement projects that promote excellence in functional urology such as, OAB, LUTS, pelvic floor disorders, voiding dysfunctions and neurogenic bladder. The secondary focus is to support other areas of study in urology such as, community-based research, practice improvement, multidisciplinary management, basic research, etc. Studies in urologic oncology will not be considered. The ultimate goal of this award is to improve patient care or further understanding the biology of urologic diseases in functional urology. The CUA-Pfizer Urology Resident Grant Program will recognize and highlight outstanding resident research/care enhancement projects.

Grants will be awarded to the successful applicant (or applicant's institution on behalf of the applicant, if applicable). It is anticipated that 3 grants of \$10,000 will be provided over a 12- month performance period.
