

YOUTH ACADEMIC INITIATIVE

The Youth Academic Initiative (YAI) promotes advanced education beyond secondary studies. This initiative provides high school students the opportunity to be part of a research team devoted to the advancement of knowledge while also attempting to improve the treatment of human health conditions.

BENEFITS

- Be part of a productive and innovative research team
- Learn cutting-edge technology to advance knowledge in neuroscience
- Contribute to improving treatments for health conditions
- Develop skills to excel in academia and in professional life

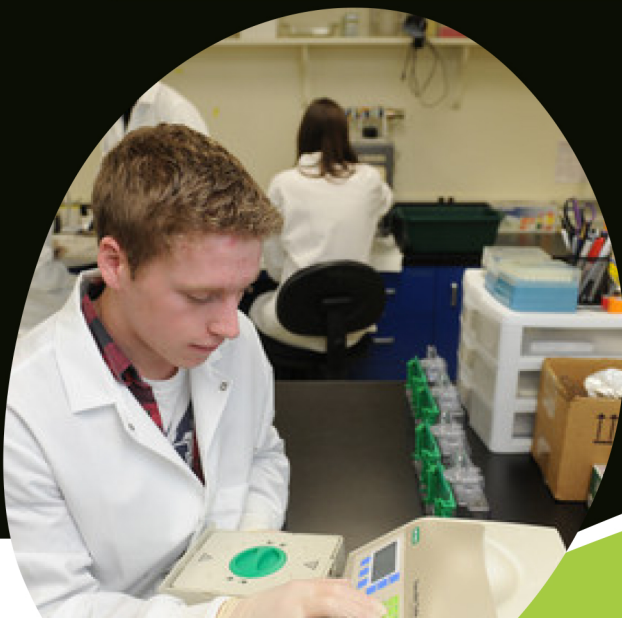

HOW IT WORKS

The Youth Academic Initiative will permit a select group of high school students to participate in and contribute to a world-class research program.

ABOUT US

We are a group of dedicated neurobiologists who are passionate in our objective to innovate novel treatments for the leading cause of childhood blindness, called amblyopia. We want to share our knowledge and enthusiasm for science to inspire the next generation of professionals so that they may make the world a better place.
