

# IMPORTANT PROGRAM UPDATES

## Neuroscience Degree

NESC2007 will NOT be offered in the 2018/19 academic year. Neuroscience students are instead required to **register for PSYO2000**.

Neuroscience students are also encouraged to register for one of the following lab sections: B04, B06, B10, or B14.

*NESC2007 and PSYO2000 are exclusionary courses, so any students who have previously taken either class, have completed this requirement for a Neuroscience degree.*

## Psychology Degree

Psychology students are NO LONGER required to complete 3000-level courses from specific categories. Category A & B classifications have been removed and Psychology students are permitted to select any 3000/4000 level Psychology courses to fulfil their program requirements.\* +

*\*Keeping in mind any lab-course requirements*

*+Students who began the program before 2017 must email [degreeaudit@dal.ca](mailto:degreeaudit@dal.ca) and request to have this requirement removed from their degree audit on DalOnline*
