Instructors:  Heike Lotze (Heike.Lotze@dal.ca), LSC 7045/47
            Boris Worm (Boris.Worm@dal.ca), LSC 4132
            Bethany Nordstrom (Bethany.Nordstrom@dal.ca), LSC 4134

Lectures:  Two hours per week: Tuesday-Thursday 4:05-4:55, LSC C202
Tutorials:  Two half-hours per week: Tuesday-Thursday 4:55-5:25, LSC C202

Course Description
This course focuses on current, often hotly debated topics in marine science. The goal is to explore where the field of marine science is now and where it will be heading in the near future. We discuss recently published papers and current research initiatives on urgent issues, including biodiversity, fisheries, oceanography, conservation, management, climate change, and human-ocean interactions. Class format includes lectures, case-studies, as well as active discussion, debates, group work and hands-on assignments.

Course Prerequisites for undergraduate students
BIOL 2060.03 and OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) and one of the following; BIOL 3065.03 or MARI 3063.03 or MARI 3080.03 or MARI 3602.03 or MARI 3761.03

Course Prerequisites for graduate students
none

Course Objectives/Learning Outcomes
Students will learn about and discuss current hot topics in marine sciences that are at the forefront of fundamental and applied research
Students will critically evaluate recent, high-profile publications and identify their importance, strengths and weaknesses
Students will think about and explore possible next steps for current research topics and initiatives
Students will assess the importance of those topics to society
Students will debate the relevance and importance of newly gained knowledge for management, conservation, education and policy development
Undergraduate students will prepare a 1-page scientific briefing on a selected topic and give a short oral summary
Graduate students will prepare a lecture-style presentation, hand-out and questions on a selected topic

Course Materials
All materials will be accessed via Brightspace website. There is no textbook.
For each lecture, we will assign 1 relevant high-profile scientific publications for students to read in order to be prepared for the next class and review questions on the reading. Selected papers will be announced one week in advance. There is no reading assignment for the 1st week of term.

Course Assessment Explanation
To account for different knowledge levels of undergraduate and graduate students but have all contribute similarly to the various lecture and tutorial components, we will have different major assignments for each group (short written and oral briefings vs 40-minute lecture), yet similar contributions to common components (i.e. review questions, contribution to discussion, literature review, stakeholder debate, exam).

Undergraduate students will prepare a 3-min oral summary and write a 500-word written briefing on a recent research development or topic. Graduate students will review the current scientific literature and prepare a 40-min lecture on a current hot topic. They will also prepare 3-5 review questions for the other students and a hand-out with notes on the lecture. Graduate students will also prepare a discussion, debate or hand-on activity to engage students in the presented topic and critically discuss its importance for science and society, existing gaps, and next steps in the line for research.

Rubrics for grading presentations and briefings (each 25% of final grade):
- Style [3%] (Clarity of speaking/writing)
- Format [3%] (Organization/length of presentation/briefing)
- Content [15%] (Depth of research; Detail of background information; Critical evaluation of recent facts and results; Proposed gaps and next steps; Understanding of methods and approach; Significance to science and society)
- Referencing [4%] (correct citations in presentation/proposal and reference list)

Graduate students need to achieve a B- to pass the course (anything below B- is an F).

Course Assessment for undergraduate students

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight (% of final grade)</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Final exam</td>
<td>30</td>
<td>Apr 5 (in class)</td>
</tr>

Other course requirements
For each lecture, we will assign 1 relevant high-profile scientific publications for students to read in order to be prepared for the next class and the clicker review questions on the reading. Selected papers will be announced one week in advance. There is no reading assignment for the 1st week of term.

Conversion of numerical grades to Final Letter Grades follows the Dalhousie Common Grade Scale

- A+ (90-100)
- B+ (77-79)
- C+ (65-69)
- D (50-54)
- A (85-89)
- B (73-76)
- C (60-64)
- F (<50)
- A- (80-84)
- B- (70-72)
- C- (55-59)

Course Policies
This is a highly interactive class and students need to be present at all times and contribute to review questions, discussions and hands-on activities. Missing more than 2 classes will lower the grade on in-class activities including clicker questions. Missed exams will count as 0%. In case of illness, a doctor’s note is needed to avoid lower marks and repeat the exam. The content of weather-related cancelled classes will be integrated into the following lectures in abbreviated form if possible. Only topics presented and discussed in class/tutorial will be tested in exams.

Course Content

<table>
<thead>
<tr>
<th>Week</th>
<th>Lectures</th>
</tr>
</thead>
</table>
| 1    | 1 – Introduction to Cutting Edge  
      | 2 – Human impacts on the ocean |
| 2    | 3 – Cutting Edge literature review  
      | 4 – Cutting Edge literature review |
| 3    | 5 – Fisheries  
      | 6 – Marine protection |
| 4    | 7 – Ocean literacy & marine education  
      | 8 – Industrial development of the oceans |
| 5    | 9 – Stakeholder debate  
      | 10 – Discovering the ocean’s microbial world |
| 6    | 11 – Discovering the ocean’s unknown macro biodiversity  
      | 12 – Global biodiversity targets and policies |
| 7    | --- STUDY BREAK --- |
| 8    | 13 – Coastal ecosystem change  
      | 14 – Aquaculture |
| 9    | 15 – Climate change impacts: empirical observations  
      | 16 – Climate change impacts: future projections |
| 10   | 17 – Discussion: Avenues for future research  
      | 18 – Discussion: Avenues for future research |
| 11   | 19 – Plastic pollution: problems  
      | 20 – Plastic pollution: solutions |
| 12   | 21 – Future proofing marine management  
      | 22 – New technologies |
| 13   | 23 – News from the Coral Reefs |
University Policies and Statements

This course is governed by the academic rules and regulations set forth in the University Calendar and by Senate.

Academic Integrity
At Dalhousie University, we are guided in all of our work by the values of academic integrity: honesty, trust, fairness, responsibility and respect (The Center for Academic Integrity, Duke University, 1999). As a student, you are required to demonstrate these values in all of the work you do. The University provides policies and procedures that every member of the university community is required to follow to ensure academic integrity.

Information: [https://www.dal.ca/dept/university_secretariat/academic/integrity.html](https://www.dal.ca/dept/university_secretariat/academic/integrity.html)

Accessibility
The Advising and Access Services Centre is Dalhousie's centre of expertise for student accessibility and accommodation. The advising team works with students who request accommodation as a result of a disability, religious obligation, or any barrier related to any other characteristic protected under Human Rights legislation (Canada and Nova Scotia).

Information: [https://www.dal.ca/campus_life/academic-support/accessibility.html](https://www.dal.ca/campus_life/academic-support/accessibility.html)

Student Code of Conduct
Everyone at Dalhousie is expected to treat others with dignity and respect. The Code of Student Conduct allows Dalhousie to take disciplinary action if students don't follow this community expectation. When appropriate, violations of the code can be resolved in a reasonable and informal manner—perhaps through a restorative justice process. If an informal resolution can't be reached, or would be inappropriate, procedures exist for formal dispute resolution.

Diversity and Inclusion – Culture of Respect
Every person at Dalhousie has a right to be respected and safe. We believe inclusiveness is fundamental to education. We stand for equality. Dalhousie is strengthened in our diversity. We are a respectful and inclusive community. We are committed to being a place where everyone feels welcome and supported, which is why our Strategic Direction prioritizes fostering a culture of diversity and inclusiveness.

Statement: [http://www.dal.ca/cultureofrespect.html](http://www.dal.ca/cultureofrespect.html)

Recognition of Mi'kmaq Territory
Dalhousie University would like to acknowledge that the University is on Traditional Mi’kmaq Territory. The Elders in Residence program provides students with access to First Nations elders for guidance, counsel and support. Visit or e-mail the Indigenous Student Centre (1321 Edward St) (elders@dal.ca).
