Spatial Information and GIS in Ecology: A Practical Introduction
Summer 2017

Instructor(s): Jennifer Strang  jennifer.strang@dal.ca
Peter Bush  peter.bush@dal.ca

GIS Centre 5th Floor Killam Library

Lectures: 8:35 – 12:00 Elizabeth May Lab (To Be Confirmed) in Life Sciences Building Earth Science/Biology Wing

Laboratories: 12:30 – 4:00 Elizabeth May Lab (To Be Confirmed) in Life Sciences Building Earth Science/Biology Wing

Field trips: June 22 – 26 Staying at Harrison Lewis Centre (See Schedule for details)

Course Description
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.

NOTES: Offered in the summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

Course Prerequisites
BIOL 2060 (Intro to Ecology)

Overview
This class offers a hands-on introduction to many basic spatial topics including GIS, GPS and Cartography, and uses Geographic Information Systems (GIS) to teach most of these topics. It introduces students to GIS – What is it? What types of problems can it solve? Throughout the class, students are shown the basics of spatial data and some of the most commonly used tools in GIS. Following one week in the classroom, students spend a week at field station where they have the opportunity to use the recently taught GIS skills to work on projects and solve problems. A number of projects will be offered for students to choose. The variety of projects will illustrate how GIS can be utilized as a tool for problem solving within a project rather than as the project itself. This course will show how GIS can be used as a tool in ecology. Students will be expected to bring together their newly acquired GIS skills with their own prior knowledge in ecology.
This class will introduce students to a wide variety of spatial topics, but with a limited depth. It is expected that students will gain enough knowledge and understanding to apply many basic GIS skills, as well as be comfortable with the general technology, layout and organization of data in GIS. The goal is for students to see how GIS can work for them, which may substantially different in the way another person may be using it. After taking this class, the student will have a basic foundation to be able to explore and understand more advanced topics through self-study or additional course work.

Course Objectives/Learning Outcomes

- Students will understand how GIS data and projects are organized
- Students understand the basics of GIS formats, particularly the ones that are native to ArcGIS
- Students will learn basics of map projections, and some of the advantages and disadvantages of the main classification types
- Students will learn about datums/projections and how they can be changed
- Students will learn how GPSs work as well as some limitations of them.
- Students will learn how to create their own geographic data
- Learn the difference between the 2 main data models used in GIS and their advantages/disadvantages
- Students will learn many basic tools of GIS while gaining the confidence to explore new tools on their own
- Students will learn how to apply the practical ecology and GIS skills in other courses and apply it to an independent group project
- Learn cartographic skills to help make useful maps.

Course Materials

- There is no text book for the class. All material will be supplied through the course website as either powerpoint or PDF files.
Course Assessment

**Participation** 5%
(showing up for class/field on time and ready to work, answering questions during class, doing share of common chores when in field, treating colleagues with respect, etc.)

**Quiz – Theory (lecture material)** 12%

**Quiz – Hands on techniques** 18%

**Assignments** 25%
- Assignment 1 (5%) Due June 20 8AM
- Assignment 2 (7%) Due June 22 8AM
- Assignment 3 (13%) Due June 28 8AM

**Final Project (group)**
- Project Outline 5%
- Project and Presentation 35%

**All assessment is to be done individually unless marked otherwise.**

**Late assignments will be docked at 5%/hr late**

Other course requirements

All students will require a memory stick (USB stick, jump drive) with 8 Gig of free space to be used for this course. **Students will require a PC (running windows) that can load and run ArcGIS for the field portion of the class.** All material will be made available through the Online Learning Environment (Brightspace). Additional readings will be available online. Students will also be required to supply a field book for notes.

Conversion of numerical grades to Final Letter Grades follows the Dalhousie Common Grade Scale

Course Policies

**Class culture:** We aim to cultivate a culture of mutual respect and collective curiosity. We ask that all students arrive to class on time, turn off their cell phones, and do not engage with materials that are outside of the course during class time. Please also be courteous of your neighbours by not distracting them during class time.

**Missed classes:** All of the information related to the logistical and administrative components of this course will be communicated in the lectures. If you miss any part of a lecture, it is your responsibility to
make contact with a fellow student and catch up on what you missed, regardless of whether the absence was justified or not.

_Late penalties:_ **Late assignments will be docked at 5%/hr late**

_Documentation:_ Documentation is required to substantiate illness and emergency. In the case of illness a doctor's note is required. In the case of other emergencies please speak with your department academic advisor about appropriate documentation (for example, a funeral program in the case of a death in the family). All documentation MUST be shared with the course instructor.

**Course Schedule** (tentative – may change due to weather, etc.)

**Day 1 – Thursday, June 15**

**Morning**
Course Expectations
Intro to GIS
  - What is a GIS?
  - Introduction to ArcGIS
    - ArcMap
      - Exercise – Trip Planning
    - ArcCatalog

**Afternoon**
GIS Data
  - How is it collected?
  - Show examples for NS
  - Show examples for World

Introduction to Basic Map Making
  - Titles
  - Scale bar
  - Legend
  - North Arrow
  - Adjusting Colour
  - Gradicules
  - Credits

Introduction to Projects Options
Day 2 – Friday, June 16

Morning

File Management

- ArcGIS Formats
  - Types of Geodatabases
    - What can go into a Geodatabase
  - Comparing Shapefiles and Geodatabases
- What is the difference between GIS Data and a GIS Project
  - Sharing GIS Data and Projects
- Understanding the difference between GIS data (shapefiles/geodatabases) and Layers
- How to create a geodatabase

Projections and Datums

- Define Projection
  - Types of projections
  - Distortions
  - Picking a projection
- Defining Datums
  - Horizontal Datums
    - Commonly used datums in NS
    - What happens if you use an incorrect datum
    - Clues that datums is different
  - Vertical Datums
    - What are they
    - Why do they matter

Afternoon

Commonly used Vector tools

- Clip
- Buffer
- Attribute Selection
- Select by Location

Day 3 – Monday, June 19

Morning

GPS
• How a GPS works
• Hands on project (geocaching)
  o Defining projection/datum
  o Saving points and lines
• Adding GPS data into a GIS

Afternoon
Creating data
• How to add points, lines, and polygons by tracing in from a georeferenced image
• How to add points, lines, and polygons using coordinates
• How to add points from a table
• Setting snapping

Editing data
• How to change the attributes of a feature
• How to change the shape/location of a feature
• Adding fields
• Calculating Area of polygons

Day 4 – Tuesday, June 20
Morning
Introduce more Vector Tools
• Erase
• Dissolve
• Merge
• Union
• Intersect
• Create Random Points

Review
Afternoon
GIS Data Models
• Comparison between Vector Model and Raster Model
  o Define the 2 models
  o Tips on when to use which
  o Advantages/Disadvantages to each
  o How to identify which model is being used
Other Topics...

- Metadata
  - Why it is important
  - How to add it
- Hyperlinking
- Other useful software

Work on Assignments or Major Project

**Day 5 – Wednesday, June 21**

*Quiz – Theory*

**Morning**

Introducing Raster Data

- Show examples of Raster data (satellite, airphoto, scanned image)
- Querying the raster data

Commonly Used Tools for Raster

- Reclassification
- Surface
  - Hillshade
  - Slope
  - Aspect
- Neighbourhoods – Local, Focal
- Raster Calculator

**Afternoon**

More commonly used Tools for Raster

- Clipping a raster
  - By attribute
  - By shape
  - By layer
- Comparing 2 interpolation methods
- Converting to Polygon

Georeferencing

**Days 6 – Day 10 (Thursday, June 22 through Monday, June 26)**

Meet at Dal at 10:00 AM on Thursday; drive to Harrison Lewis Centre, Sandy Bay Landings, Port Joli area. See list of personal items below that you need to bring.
Work on data collection/verification during the day, evening spent working on Major project
Return to Dal by 5:00 PM on Monday.

**Day 11 – Tuesday, June 27**

**Morning**

**Quiz – Hands-on**

**Afternoon**

Cartography

- Color
  - Ways of representing color
  - Tips for color choices
- Typography
  - What are the 2 main font families
  - Tips on choosing fonts
- Basics
  - Aligning features
  - Other misc.

**Work on Projects**

**Days 12-13 – Wednesday, June 28 and Thursday, June 29**

Work on Final Project
(Will be expected to be in class)

**Day 14 – Friday, June 30**

Present Final Projects / Pass in Final Projects
What to bring on field trips

- Snacks & special treats for yourself
- Field notebook
- Class handouts and notes
- Clipboard and notebook paper
- Pens & pencils (the latter for rain)
- Plastic bags to keep things dry
- Re-usable water bottle
- Sleeping bag
- Flashlight & extra batteries
- Small daypack to carry your things
- Bug head net or jacket (optional)
- Rubber boots
- Hiking boots
- Sneakers or sandals
- Slippers to wear in the cookhouse
- Wind jacket
- Raingear (jacket & pants)
- Long pants, long sleeved shirts
- Ball cap or hat with sun brim
- Sunglasses
- Warm hat and gloves
- Sweater, sweatshirt or fleece jacket
- Hair ties for long hair
- Underwear/socks
- Long underwear for cool nights
- Swimsuit (optional)
- Sunscreen, insect repellent
- Personal toiletries, toothbrush & paste, soap, shampoo, towel
- Prescriptions drugs you need to take
- Allergy medication (e.g. Benedryl)
- Aspirin/Tylenol/ibuprofen
- Cash (if you need to buy anything)
- Novel or other reading (optional)
- PC Laptop for GIS work
- Other laptop (optional; wireless satellite internet available)
- Field guides (optional)
- Binoculars (optional)
- Camera (optional)
ACCOMMODATION POLICY FOR STUDENTS

Students may request accommodation as a result of barriers related to disability, religious obligation, or any characteristic protected under Canadian Human Rights legislation. The full text of Dalhousie’s Student Accommodation Policy can be accessed here: http://www.dal.ca/dept/university_secretariat/policies/academic/student-accommodation-policy-wef-sep--1--2014.html

Students who require accommodation for classroom participation or the writing of tests and exams should make their request to the Advising and Access Services Centre (AASC) prior to or at the outset of the regular academic year. More information and the Request for Accommodation form are available at www.dal.ca/access.

ACADEMIC INTEGRITY

Academic integrity, with its embodied values, is seen as a foundation of Dalhousie University. It is the responsibility of all students to be familiar with behaviours and practices associated with academic integrity. Instructors are required to forward any suspected cases of plagiarism or other forms of academic cheating to the Academic Integrity Officer for their Faculty.

The Academic Integrity website (http://academicintegrity.dal.ca) provides students and faculty with information on plagiarism and other forms of academic dishonesty, and has resources to help students succeed honestly. The full text of Dalhousie’s Policy on Intellectual Honesty and Faculty Discipline Procedures is available here: http://www.dal.ca/dept/university_secretariat/academic-integrity/academic-policies.html

STUDENT CODE OF CONDUCT

Dalhousie University has a student code of conduct, and it is expected that students will adhere to the code during their participation in lectures and other activities associated with this course. In general:

“The University treats students as adults free to organize their own personal lives, behaviour and associations subject only to the law, and to University regulations that are necessary to protect

- the integrity and proper functioning of the academic and non–academic programs and activities of the University or its faculties, schools or departments;
- the peaceful and safe enjoyment of University facilities by other members of the University and the public;
- the freedom of members of the University to participate reasonably in the programs of the University and in activities on the University's premises;
- the property of the University or its members.”

## SERVICES AVAILABLE TO STUDENTS

The following campus services are available to help students develop skills in library research, scientific writing, and effective study habits. The services are available to all Dalhousie students and, unless noted otherwise, are free.
