

### The Dr. J.G. Ogden Memorial Prize

This prize will be awarded annually to a top 4<sup>th</sup> year honour student whose research falls within the realm of freshwater ecology, with preference given to those studying freshwater plant ecology. The recipient will be determined from the Cameron Conference poster and oral presentations. In the event that there is more than one student whose research project meets this criterion, overall GPA will be the deciding factor. Should no students meet the requirements, the money will be rolled back into the principal, and no award presented that particular year.
