

# Vemco Scholarship in Marine Biology

## ATTENTION FINAL YEAR MARINE HONOURS STUDENTS

The company Amirix Systems Inc. created a fund to award a Vemco Scholarship to a deserving student. The terms of the award are:

1. To provide a scholarship to a student entering the **final year of Marine Biology**. Students can be in Marine Co-op as well, **but must be in the Honours program**.
2. The recipient of the scholarship will have demonstrated significant academic achievement. This will be determined from students' GPAs in their upper level (>1000) Biology/Marine classes. Only students with a minimum of a 3.3 (B+) GPA in these classes should consider applying.
3. The recipient will also have demonstrated extracurricular involvement including any of the following: athletics, fine arts, student body involvement and/or volunteer work in the community. Applicants will be required to submit a letter to the Honours/Undergraduate Awards Committee highlighting their extracurricular activities. The Committee will then select the student with the top GPA who also satisfies the extracurricular terms.

**In a single PDF file, email your completed application to Prof Glenn Crossin ([gtc@dal.ca](mailto:gtc@dal.ca)) by 25 October 2022. Be sure to include:**

1. A letter highlighting your relevant extracurricular activities and why you feel you would be a worthy recipient of this scholarship.
2. An unofficial copy of your Academic Record.
