

Here's what's happening in the

# BASIN & RESERVOIR LAB

Professor Grant Wach

January 2019

Editor: Trudy Lewis (Trudy.lewis@dal.ca)

## Petroleum Geoscience Field Methods Course (Trinidad) EARTH 4157

Students have been selected to attend the Petroleum Geoscience Field Methods Course in Trinidad. Emma Xin Yue Hu will be the Research Assistant coordinating the course with Prof. Grant Wach. In Trinidad they will be joined by Adjunct Dr. Hasley Vincent. The Petroleum Geoscience Field Methods Course (Trinidad) is a credit course. The Field Week is during Reading Week in February.

## “Old Hands and the “New Generation” Sable Dinner

The Basin and Reservoir Lab was pleased to host the “Old Hands and the “New Generation” to celebrate the Geoscience Legacy of the Sable Offshore Energy Project dinner.

Professor Grant Wach provided the following message:

*“the geoscience legacy of Sable will continue for many, many years. We must remember the vision of the explorationists, people like Mobil’s Don Axford, who in the 1950s knew in their gut there was oil off the Scotian coast. These are the oil finders. They were followed by geologists and engineers from companies and governments who shepherded these discoveries to production lasting almost two decades.*

*We have the legacy of the Pengrowth and Nova Scotia scholarship program that provides opportunities for our students to study disciplines in the Energy field. And there is the legacy of the geoscience data. The Sable MegaMerge seismic data and well data is a legacy that generated over two dozen student theses and will endure for at least another two decades.”*

## A Fond Farewell

The Basin & Reservoir Lab would like to wish a fond farewell, and much success, to Fiona Henderson, who was part of our GaSP Program, as she heads off to Australia in pursuit of her Masters degree!

## EAGE Competitions

Two teams from the Department of Earth Sciences have been selected for the EAGE Laurie Dake Field Challenge and the Minus CO2 Challenge.

The Minus CO<sub>2</sub> Team has made the Semi Finals! Three teams will win an expenses-paid trip to the EAGE’s Annual Conference for the grand final in London on June 2019.

## Welcome Back

The Basin and Reservoir Team is pleased to welcome back Dr. Ricardo Silva to the Lab! Dr. Silva will be continuing with his research on Petroleum Systems Analysis .

## CSPG Gold Medal Award

Congratulations go out to Prof. Grant Wach, who will be receiving the Gold Medal Slipper Award, from CSPG, at the Geoconvention to be held in Calgary this year in May 13—17.
