Faculty of Science Course Syllabus
Department of Economics
Economics 2211
Economics of Innovation
Fall 2019

Instructor(s): Jonathan J Simms jjsimms@dal.ca A-13, 6220 University Ave.
Lectures: 17:35 – 18:55 Tuesdays and Thursdays Sir James Dunn Bldg. Room 302
Teaching Assistant:

Course Description

This course examines the place of innovation in microeconomic policy space. It does so from two perspectives: the capacity of the private sector to recognize and address productivity gaps with investments in innovative products, processes and methods, on the one hand, and the capacity (i.e., limits) of government policy and program initiatives to promote innovation in their economies, on the other. NOTE: All Economics courses, unless stated otherwise, must have a minimum grade requirement of C for their prerequisite courses.

Course Prerequisites

ECON 1101 or ECON 1102, or by permission of the professor

Course Objectives/Learning Outcomes

• To enhance students’ understanding of the innovation imperative in growing economy
• To improve students’ knowledge of what accounts for the state of innovation performance
• To survey with students the key factors that comprise a framework for an innovation strategy
• To improve students’ capacity to critically assess innovation policy in a global context

Course Requirements

This is a course for economics majors and those who have already declared a field of study in science, engineering and sustainability and who would like to explore the implications of their anticipated pursuits in the context of the economy. To that end, each week of classes will include one session on the topic assigned for that week and a second session designed to introduce the practical aspects of science, technology, engineering and mathematics’ (STEM’s) contributing innovations to productivity and growth in our modern, post-industrial economy.

The practical/experiential sessions will be of three varieties:

Field Trips. Field trips may be arranged according to the existing Faculty of Science practices and rules, with the possibility of additional fees for buses etc, if necessary, and these fees will be announced in advance. Such visits may be to one or more of the following: a research lab, a business, public sector facilities, and a non-governmental organization. These will be designed to introduce the economic considerations – both upstream and downstream - that are required for the pursuit of a new invention, introducing a new innovation, investing in a commercialization opportunity, or offering an environmentally sustainable product or production process.

Presentations: Guest Speakers/ Panel discussions on economics topics that pertain to the inputs, operations and outputs of innovation initiatives such as, intellectual property and patent law, management innovation, processing innovations, product and service innovations, and public policy (regulatory and program development).

Workshop. “The Research Entrepreneur Entering the Innovation Ecosystem”: the micro- and macro-economic considerations involved in the policy and program aspects behind major R&D funding programs and the practical steps required to explore, develop and produce a winning “Start-up” application proposal.

Students will be evaluated on the following:
Assignments (Value 35%): There will be seven 1-page assignments: each will be based on the theme of that week, and they will draw from an article dealing with the subject.

Joint Project and “Pitch” (Value 25%): Drawing on the various components of the course, together with lessons gained from the workshop, students will work in groups of up to 5 members to prepare a proposal demonstrating the economic theory and rationale for the funding of an innovation (e.g., a research grant, financial investment in a new innovative production process, or the funding of the commercialization of a new product or service) that advances the social, economic or environmental benefits to the firm, the community or the industrial economy, in general, in one of four industries: information technologies, advanced manufacturing, ocean technologies, and life sciences. In addition to their multi-sectioned project binder, each group will deliver a ‘pitch’ for the proposal to the class, and each group will adjudicate the “pitch” of another group. Each team member’s segment of the proposal package must be at least 4 pages in length, as per the policies noted below (plus charts and graphs, as necessary). The ‘pitch’, in class, will be comprised of a 15-minute (10 to 12 slides) presentation followed by a 15 minute Q&A segment.

Final Examination (Value 45%): a multiple choice section, a required question section, and an optional questions section.

Course Policies

To make-up for missing a submission or the final exam, students will require a medical certificate.

As this is a more experientially-based course, your attendance and participation is particularly essential. Therefore, absence from three of the eight presentations and field trips (combined total) will result in a deduction of 10 points from your final grade.

All deliverables (assignments and the project) are to be double-spaced, 12-pt font, New Times Roman with bibliographies and annexes, as required). No more than 15% of the text is to be quotations. Citation protocols APA or Chicago may be used. All assignments are due at 12:00PM (Noon), in soft copy, to the Teaching Assistant, on their due date. Late assignments will receive a zero, unless accompanied by a medical excuse. Projects are due on November 19th at 4:30, in hardcopy, at the Economics Department. Students who do not have their section of their team’s project completed on time, will be deducted 10 of their 20 points, for each late day.

Course Content

Sept 3  Imperative Atkinson, Robert D. and Ezell, Stephen J Ch 1
Sept 5  Decline Atkinson, Robert D. and Ezell, Stephen J Ch 2 - 3
Sept 10 Challenges Atkinson, Robert D. and Ezell, Stephen J Ch 4
Sept 12 PRESENTATION: Innovation Solutions
Sept 17 Trends
Sept 19 FIELD TRIP 1: IDEA/ShiftKey/CDC
Sept 24  Talent

Sept 26  WORKSHOP: BDC/Innovacorp (Assign 1 DUE)

Oct 1  Frameworks  Atkinson, Robert D. and Ezell, Stephen J  Ch 5  Project Teams Formed — with Lead Coordinator - and Project topics defined) delivered to TA

Oct 3  FIELDTRIP 2: DEFSEC Tour (Assign 2 DUE)

Oct 8  Applied  Atkinson, Robert D. and Ezell, Stephen J  Ch 6

Oct 31  FIELD TRIP 3: COVE (Assign 6 DUE)

Nov 5  Forward  Atkinson, Robert D. and Ezell, Stephen J, Ch 11

Nov 7  FIELD TRIP 4: BIOPORT (Assign 7 DUE)

Nov 12  No Class
ACCOMMODATION POLICY FOR STUDENTS
Students may request accommodation as a result of barriers related to disability, religious obligation, or any characteristic protected under Canadian Human Rights legislation. The full text of Dalhousie’s Student Accommodation Policy can be accessed here: http://www.dal.ca/dept/university_secretariat/policies/academic/student-accommodation-policy-wef-sep--1--2014.html

Students who require accommodation for classroom participation or the writing of tests and exams should make their request to the Advising and Access Services Centre (AASC) prior to or at the outset of the regular academic year. More information and the Request for Accommodation form are available at www.dal.ca/access.

ACADEMIC INTEGRITY
Academic integrity, with its embodied values, is seen as a foundation of Dalhousie University. It is the responsibility of all students to be familiar with behaviours and practices associated with academic integrity. Instructors are required to forward any suspected cases of plagiarism or other forms of academic cheating to the Academic Integrity Officer for their Faculty.

The Academic Integrity website (http://academicintegrity.dal.ca) provides students and faculty with information on plagiarism and other forms of academic dishonesty, and has resources to help students succeed honestly. The full text of Dalhousie’s Policy on Intellectual Honesty and Faculty Discipline Procedures is available here: http://www.dal.ca/dept/university_secretariat/academic-integrity/academic-policies.html

STUDENT CODE OF CONDUCT
Dalhousie University has a student code of conduct, and it is expected that students will adhere to the code during their participation in lectures and other activities associated with this course. In general:

“The University treats students as adults free to organize their own personal lives, behaviour and associations subject only to the law, and to University regulations that are necessary to protect

• the integrity and proper functioning of the academic and non–academic programs and activities of the University or its faculties, schools or departments;
• the peaceful and safe enjoyment of University facilities by other members of the University and the public;
• the freedom of members of the University to participate reasonably in the programs of the University and in activities on the University's premises;
• the property of the University or its members.”

The full text of the code can be found here:
The following campus services are available to help students develop skills in library research, scientific writing, and effective study habits. The services are available to all Dalhousie students and, unless noted otherwise, are free.
