

# INTERNETWORKING

## Master of Engineering (MEng)

The Internetworking Program's degree is a course-based Master of Engineering in Internetworking (MEI). The program is two years long and students must follow the prescribed program of study. There is a strong practical component to ensure that graduates are "industry ready" upon completion.

# Why study Internetworking at Dalhousie?

## PROGRAM STRENGTHS

The Internetworking program is designed to prepare graduates for a career in the Internetworking and networking application industries. Graduates have a solid base in the underlying sciences required to understand and apply their skills in industry. Whether it be in core networks, virtual systems, or network programming, practical skills and applied theory through hands on laboratory and workshop learning prepares graduates for the many different elements of internetworking.

## POTENTIAL CAREERS

Our rigorous, comprehensive program will provide you with the practical skills to advance in the field of Internetworking. Graduates hold positions as Network System Designers, Network Managers, Network Analysts and Planners, Network Administrators, Network Consultants, I.T. Security Analysts, VoIP Engineers, Systems Test Engineers, and Developers of both software and hardware for networks.

## ADMISSION REQUIREMENTS

Candidates must satisfy the general requirements for admission to the Faculty of Graduate Studies in addition to a 4 year honours degree or equivalent in Applied Science (Engineering, Computer Science, Physics, Applied Mathematics etc.).

## LENGTH OF PROGRAM

MEng; typical time to complete is 2 years

## APPLICATION DEADLINE

The Internetworking Program accepts applications year-round. Applications are applied to the next available intake. There are intakes in September and January.
