

# MEDICAL RESEARCH

Master of Science (MSc)

Doctor of Philosophy (PhD)

This program is designed for persons who will become clinicians, but who plan careers as clinician scientists. The goal of the program is to provide clinicians with structured and rigorous research training over two to five years that will equip them with the knowledge, skills and experience to effectively incorporate research into their careers and to bridge the gap between clinical practice and medical research. These research opportunities span the entire spectrum from basic science to translational to medical education. In addition, the program offers training in clinical research. The program is open to residents, international medical graduates, physicians, dentists and veterinarians.
