

Research End Dates (GFP)

1. If the Grant End Date will end within the graduate funding award period, the system will return an error if you enter the award for the full year.
2. To resolve this, each term should be entered on a separate line. This will allow us to process the funding for the terms prior to the grant expiration date. In this example, the Grant End Date is March 31, 2020. To process, you will enter three separate awards/lines. One for the fall term, another for the winter term and another for the summer term.
3. Create three research awards – see below.

[New Allocation For Another Student](#)

Please note terms must be kept separate so in this example you would create the first entry for September to December, then January to April and May to August.

The final result is you will have a line for each term and you will be able to process the terms prior to the grant end date, (Sept-Dec) and have options to process the winter and summer terms. The winter and summer terms will still give you a warning on the status bar so it will be included in your Warnings and Errors to address before the funding for that term can be processed.

Options to Process Winter and Summer Terms:

There are a couple of options to process the winter term. If the grant end date has not been extended when it is time to process the winter term, you can do one of two things.

#1 – You can change the funding in the winter to be paid out by March 31st, which is before the grant end date. The implication would be that the student would receive their funding over the three months from January to March, versus the four months from January to April. If you and your student are ok with this, it is the simplest option.

#2 - If the funding for this student ends in the winter term, there may be a possibility of a 30-day extension to the Grant End Date if that would assist in your situation. If in this example the award funding period was only until April 30, 2020, then the 30-day extension would be an option. Please phone Bobbi Bowering at 902-494-2529 to discuss the possibility of an extension.

If the student has summer funding, you will need to address the grant end date before submitting the summer funding. If the grant end date is extended, this would correct the error. If not, you will need to change the org and account code to an active one.

Please note, it will show on the letter of offer as three line items with the specified award funding periods. They will also see the total.
