

The Division of Kinesiology Presents the 2016 Larry Maloney Lecture

Dr. Raymond Klein
Department of Psychology and Neuroscience
Dalhousie University

“Eye Movement Control and Covert Attention: Embodied
or Disembodied Cognition”

Dr. Klein is an international leader in cognitive psychology, focusing on the study of attention systems in the human brain. He is best known for his contributions to the study of orienting and inhibition of return, but he has made important contributions in many diverse areas of human performance in basic and applied contexts.

Join us at 3:30 pm on Wednesday March 23 in CHEB C140
(Collaborative Health Education Building). All are
welcome to attend.
