introduction

This Student Handbook provides information to support students throughout their studies.

Students will find useful and important information regarding guidelines, resources, services, and university standards. These resources and services have three sources: Dalhousie University, the Faculty of Health, and the School of Health Sciences itself.

The School of Health Sciences is located in Fenwick Medical Centre, 5595 Fenwick Street, Halifax, Nova Scotia, Suite 200. Students will frequently visit various clinical areas within NS Health. Therefore, relevant Nova Scotia Health policies and information are also included.

Please review and familiarize yourself with the handbook's content. You should refer to it often to guide you through your school year.

While our operating plans continue to be based on a common safety framework shared by all of Nova Scotia's universities, our Dal-specific plans are grounded in academic and student life experience as well as our shared health and safety.

However, it is important to be aware that public health conditions can change.

[Check in regularly with Dal's policies.](#)

Students must monitor their Dalhousie email regularly for updates from the school.

**SCHOOL OF
HEALTH SCIENCES**

Director's Message

On behalf of faculty, staff, and students, it is my pleasure to welcome you to the School of Health Sciences for September 2026! For returning students, welcome back, and for new students, congratulations on your admission to the School of Health Sciences (SHS).

Regardless of the profession you have chosen to pursue, I am confident you will find your time at Dalhousie University both exciting and challenging. The Bachelor of Health Science degree program is a unique interprofessional and collaborative program where you will not only learn about your own health discipline, but you will also learn about many others.

With over 250 students these programs provide students with both a sense of community combined with small classes. We are co-located within both Dalhousie University and Nova Scotia Health, so you will get to study in both clinical and academic spaces at the same time. We have fabulous learning spaces with all of the latest technology that is so important for hands on learning.

You will find yourself at the SHS surrounded by competent, caring, and dedicated professionals, who are here to guide you in becoming excellent health care professionals. There are many resources and programs at Dalhousie University to support your academic life and work. I urge you to take advantage of these resources and seek out opportunities that this university-based education provides.

[The Students' Association of Health Sciences \(SAHS\)](#) is an integral and vibrant part of the School. I meet regularly with the President of the Association to discuss student issues and to ensure students have a voice in school committees. The society also plans and hosts numerous events for students throughout the year. They are welcoming and inclusive, and I encourage you to participate. It is a great way to meet new friends.

It is important to familiarize yourself with the information, policies, procedures, and expectations outlined in this handbook. It is a lot of information, but it is very important and we have worked hard to make it as inclusive and helpful as possible. However, if you have unanswered questions after a careful reading of the handbook, please [contact our admissions & program assistant or an academic advisor](#).

As a small school, we want to offer you any support that you need and encourage students to reach out with any questions. Your efforts and dedication to your chosen programs of study will create positive experiences and successes as you grow and excel both academically and professionally in becoming our future health science professionals. We look forward to welcoming you to campus this fall!

Sincerely,
Catherine Gunn, BSc. RTR, MBA
Director, School of Health Sciences

Introduction to the School of Health Sciences, Dalhousie University

The SHS is an academic unit in the Faculty of Health at Dalhousie University, located in the Fenwick Medical Centre, 5595 Fenwick Street. Founded in 1818, Dalhousie is a government and privately funded university with a student enrolment of over 20,000 full and part-time students.

Dalhousie has a long-standing commitment to research and teaching at the graduate and undergraduate level, as well as a strong record of public and community service. The mission statement of the university commits it to serve Nova Scotia, Atlantic Canada, the nation, and the global communities through activities that integrate research, scholarship, teaching, and service.

At Dalhousie, students are encouraged and assisted to develop necessary skills, and to master the specialized skills, information, and theories of their chosen discipline (Aims of Undergraduate Education at Dalhousie, 1990).

In 1989, the Senate and Board of Governors of Dalhousie University designated Health Studies as one of two areas of Special Emphasis and recognized Health Studies as the largest and most extensive area of academic activity at Dalhousie (Discussion Paper, Task Force on Health Studies, 1991).

The Bachelor of Health Science program was formally created and approved by the Dalhousie Senate in 1999 and is offered through a partnership of Dalhousie University and Nova Scotia Health. Its professional programs of Diagnostic Medical Ultrasound Technology, Magnetic Resonance Imaging Technology, Nuclear Medicine Technology, Radiological Technology, and Respiratory Therapy are accredited by Accreditation Canada.

Under the leadership of Dean Brenda Merritt, PhD, the mission of the Faculty of Health is:

To engage, explore, and educate to advance health.

DALHOUSIE
UNIVERSITY

FACULTY OF HEALTH

Student Services & Important Resources

AT THE SCHOOL OF HEALTH SCIENCES

Several student services and facilities are available in the [Fenwick Medical Centre](#) through the main office, located in Suite 200.

Office Hours

The administrative offices are located in Suite 200 of the Fenwick Medical Centre and are open Monday through Friday from 8:00 a.m. to 4:00 p.m.

Borrowing School Equipment & Reference Material

During the school term, specific items and texts are available on loan to students. It is important that students accept full responsibility for return of these items to the School.

Access to some equipment is through individual professional programs and the permission of the instructor is usually required.

STUDENT SPACES

The 3rd Floor of the centre has two student spaces.

306 has day use only lockers for School of Health Sciences students. It also has a lounge space and study rooms.

315 has a study space, quiet room, free pantry, fridges, microwave, kettle, toaster, and toaster oven. All for School of Health Sciences students only. This room also has computers for student access.

Students will require their Dal Card to access these rooms.

CONTACT INFORMATION

For a more detailed list of Faculty and Staff, [please visit our website.](#)

Student Services & Important Resources

"Planning protects your mind...it's worth spotlighting one of the simplest, most underrated ways to support your well-being: better planning." [Chris Richardson](#)

If you have not already taken the time to visit the [Dalhousie Academic Calendar](#), we recommend you do so ASAP! Add these important dates to your personal calendar/timetable.

These important dates include the ***last day to add/drop a course, when the university is closed, winter/spring breaks, as well as when exams begin and end.***

Please note, students are responsible for registering for courses and ensuring timetable conflicts do not occur. The SHS has organized class scheduling by degree program to accommodate at least one of the available selections of non-School courses/electives).

[A guide to Student Life and Services](#) at Dalhousie University is available online. Here you will find information on but not limited to:

- Dalhousie Bookstore
- Dal Student Union
- Libraries & Print Services
- Tech Support
- Brightspace

[Dalhousie University offers a wide range of student supports.](#) This page will direct you to the many support services available to Dalhousie students. Here you will find information on but not limited to:

- Black student support
- Indigenous student support
- Spiritual support
- 2SLGBTQ+ support
- Safety and wellbeing
- Accessibility and accommodations
- Study skills
- Writing support

[Student Health & Wellness](#) offers a variety of services and supports for Dalhousie students. Visiting this site will allow students to book appointments online. If you are a new student it is important to set up a health profile before your first appointment. To help students pay for their health services, Dalhousie offers the DSU Health and Dental Plan. Students will also find important information on how to opt IN or OUT of the DSU Health Plan by visiting this page.

Student Services & Important Resources

"There is no health without mental health; mental health is too important to be left to the professionals alone, and mental health is everyone's business." – [Vikram Patel](#)

[HRES PURPLE FOLDER](#) (Responding to a disclosure of sexualized violence)

"Sexualized violence is an umbrella term that can include but is not limited to: creating and/or sharing images without consent, stalking or voyeurism (watching others engaged in sexual activities or naked), intimate partner violence, and online harassment of a sexual nature. Please refer to the [Sexualized Violence Policy](#) for complete definitions."

[Dalhousie University Human Rights and Equity Services](#) provides trauma informed; survivor centered confidential advisory service to members of the Dalhousie community. On this page you will find information on but not limited to:

- Anti-Racism Module
- Educational Resources
- Accommodation and accessibility
- Discrimination
- Personal harassment and conflict
- Confidential reporting
- Safety planning with security services

LIBRARY RESOURCES

The [Nova Scotia Health Libraries](#) are accessible with a valid NS Health ID. Online resources remain available 24/7.

[The Dalhousie Kellogg Library Learning Commons](#) is available for students to use for studying. Please verify hours of operation by consulting their website.

[The Collaborative Health Education Building \(CHEB\)](#) Located at 5793 University Avenue. Students will find various study areas throughout. Connected to the CHEB is the Sir Charles Tupper Building. This is where you will find The Kellogg Health Science Library on the second floor.

Student Services & Important Resources

"Always take some of the play, fun, freedom and wonder of the weekend into your week and your work." — [Rasheed Ogunlaru](#)

WAYS TO GET INVOLVED

Dalhousie University and the School of Health Sciences offer many opportunities to get involved in various societies and activities to help balance out work and play.

[The Dalhousie Student Union \(DSU\)](#) oversees the development and growth of +300 student led societies. This page offers a directory of options for students to get involved here on campus. [This page also links to the new Digital Housing Board](#). If students have a room or apartment for rent or are looking for a roommate be sure to check it out.

[The Dal Student Life blog](#) is also a great way to get to know the Dal community. This is a student run blog which offers everything from academic advice, recipes, interview advice and much, much more.

[Dalplex - Athletics & Recreation](#) offers a variety of athletics and wellness activities. Want to be part of a varsity team? [Check out Dalhousie Tigers page](#) for information on try outs and game schedule.

[Dal events](#) is also a great resource to find out what is happening on campus.

THE STUDENTS' ASSOCIATION OF HEALTH SCIENCES (SAHS)

The Students' Association of Health Sciences (SAHS) is the academic, political, and social voice of students in the SHS. Working together with students, the SAHS Executive provides liaison with the School's Administration and ensures appropriate student representation on a variety of School and Faculty level academic committees.

A call will be sent out to all students in the early Fall of each academic year with available positions and an application to volunteer.

SAHS Executive

For the current executive, [please refer to the School of Health Science's Online Community](#).

Dalhousie Health Sciences Students' Association (Dal HSSA)

The Dal HSSA advocates for interprofessional education among disciplines dedicated to the various aspects of health care at Dalhousie University. For information on how to get involved please visit facebook.com/dalhssa/

Student Services & Important Resources

STAFF ROLES & RESPONSIBILITIES

The School of Health Sciences Administrative Team are here to help. Please visit our website to find out more about the [different roles and responsibilities of our team.](#)

ACADEMIC REGULATIONS OFFICER (ARO)

The Academic Regulations Officer, under the authority of the Director, will interpret and apply the Academic Regulations of the SHS and will be responsible for decisions on routine matters (waivers, letters of permission, requests for transfer credit, etc.)

Requests to waive an academic regulation can be submitted through [Dal Online](#), or via the forms below.

- [Permission to carry more than a normal workload](#)
- [Letter of Permission](#)

If the waiver you need isn't available, submit your request to the ARO with a completed [Application for a Waiver of Academic Regulation](#).

FEES & EXTRA COSTS

Fee schedules for tuition, miscellaneous student fees, and health insurance are available at [Student Accounts](#).

Important Note: Student Accounts will provide a monthly statement of the amount owing on your account via your @dal.ca email address. This is a very good reason to check this email account regularly. Extra fees for late payment, etc., can quickly add up.

Students in the SHS will also have received an Additional Expense Sheet via email with preclinical requirements and other important program information. This information is provided to assist students with their financial planning and to ensure that students are prepared for these additional costs.

All disciplines in the Bachelor of Health Sciences program have associated additional costs. Students should prepare for and expect these expenses in addition to tuition, student fees, and textbooks. [The breakdown of these costs can be found on the School of Health Sciences website.](#)

Dalhousie University students are also encouraged to visit the [Money Matters page](#) for additional information on but not limited to, tuition & payments, awards & financial aid, managing your money, financial resources.

NATIONAL PROFESSIONAL ASSOCIATIONS & REGULATORY BODIES

It's important for students to understand the distinct roles played by the University and the professional associations and provincial regulatory bodies which regulate professional practice, as this directly impacts student studies and future careers.

National professional associations provide Health Sciences graduates with entry-to-practice certification exams and advance each profession through education, research, and advocacy.

Provincial regulatory bodies protect the public and ensure the integrity of the profession by holding the professionals accountable to safe, competent, and ethical care.

Entry-to-practice requirements generally include a specified educational qualification and a passing mark on a certification/registry exam. These exams are set by the professional association or by an associated body to which the responsibility has been delegated.

The professional association determines the eligibility criteria of candidates to write the exam. In general, candidates are eligible to write once they have successfully completed an accredited program. School of Health Sciences programs prepare students to be eligible for the entry-to practice exams.

Dalhousie University confers both a Diploma in Health Science (Diagnostic Medical Ultrasound Technology and Respiratory Therapy) and a Bachelor of Health Science (Specific Discipline) degree.

Certificates are also available (Cardiac Ultrasound, Vascular Ultrasound and Magnetic Resonance Imaging Technology). The programs leading to these credentials are accredited. The University does not determine eligibility for certification/registry exams. Rather, through accreditation, the University ensures that graduates of its programs meet eligibility criteria set by professional associations.

CERTIFICATION/REGISTRY EXAM TIMELINES

Students in Diagnostic Medical Ultrasound Technology (DMUT) and Respiratory Therapy (RSPT) are eligible to write certification/registry exams when all requirements for diploma exit (typically at the conclusion of year 3) are met.

Students in Nuclear Medicine Technology (NUMT) and Radiological Technology (RADT) are eligible to write registry exams when all requirements for their respective BHSc degrees are met.

Magnetic Resonance Imaging Technology (MRIT) students are eligible to write the certification exam when all requirements for a Certificate in Magnetic Resonance Imaging Technology are met.

DMUT students may choose to complete a certificate in Cardiac Ultrasound or Vascular Ultrasound in the 4th year of the program to earn an additional credential. Students are eligible to write relevant registry exams when all requirements are met.

CONTACT INFORMATION

Diagnostic Medical Ultrasound Technology (DMUT)

The Nova Scotia Regulator of Medical Imaging and Radiation Therapy (NSRMIRT) is the provincial regulatory body accountable for protection of the public. It governs the scope of practice, standards of practice, and licensing criteria for all actively practicing medical radiation technologists (MRTs) and diagnostic medical sonographers (DMSs) in Nova Scotia. The mandate of the NSRMIRT is to serve and protect the public interest.

Website: nscmirtp.ca

Sonography Canada is the national professional body for the Sonography profession and supports the profession through providing national credentials and entry-to-practice credentialing exams.

Website: sonographycanada.ca

Student Services & Important Resources

Nuclear Medicine Technology, Radiological Technology, & Magnetic Resonance Imaging Technology (NUMT, RADT, MRIT)

The Nova Scotia Regulator of Medical Imaging and Radiation Therapy (NSRMIRT) is the provincial regulatory body accountable for protection of the public. It governs the scope of practice, standards of practice, and licensing criteria for all actively practicing medical radiation technologists (MRTs) and diagnostic medical sonographers (DMSs) in Nova Scotia. The mandate of the NSRMIRT is to serve and protect the public interest.

Website: nscmirtp.ca

The Canadian Association of Medical Radiation Technologists (CAMRT) is the national professional body for the MRT profession. It supports the professions by providing national credentials and entry-to-practice credentialing exams for all disciplines.

Website: camrt.ca

Respiratory Therapy (RSPT)

The Nova Scotia Regulator of Respiratory Therapists (NSRRT) is the provincial regulatory body accountable for protection of the public. It governs the scope of practice, standards of practice, and licensing criteria for all actively practicing Respiratory Therapists in Nova Scotia.

Website: nsrrt.com

The Canadian Society of Respiratory Therapists (CSRT) is the national professional association for RTs. Students in the RSPT program are encouraged to become members of the CSRT at the start of their studies by visiting the membership page at

csrt.com/join or via email request sent to membership@csrt.com.

Website: csrt.com

Frequently Asked Questions

WHAT IS IPHE 4900?

"Interprofessional education occurs when students from two or more professions learn about, from, and with each other to enable effective collaboration and improve health outcomes. Once students understand how to work interprofessionally, they are ready to enter the workplace as a member of the collaborative practice team. [This is a key step in moving health systems from fragmentation to a position of strength.](#)"

NOTE: Time is protected in the academic timetable on Tuesdays and Thursdays from 4:00-6:00 pm; students will be advised by their program in advance when their required IPE classes are scheduled. Students should check the timetable for the appropriate section for their school/college to ensure they are registered for that section.

If you haven't done so already, please register for IPHE 4900 Section 03 as soon as possible. Health Sciences students are required to register for IPHE 4900 Section 3 each term without exception, including during the summer clinical practicum.

WHAT DO I NEED TO KNOW ABOUT MY CLINICAL LEARNING EXPERIENCE?

"Successful completion of all clinical components of the program is mandatory. Clinical Practica and clinical education courses are required courses in the program of study and it is not possible to exercise the diploma exit option or receive a BHSc degree without successfully completing these courses. In addition, each of the clinical experiences is a prerequisite for further progress in the Program."

It is important to visit the [Clinical Education page](#) to review information on but not limited to:

- attendance policy
- [preclinical requirements](#) (including criminal record check)
- clinical location placements
- other frequently asked questions

There are several immunization and other occupational health requirements that health care worker students need before they begin any clinical placement in a health facility through the course of their health professional program. Please visit the [Faculty of Health website](#) for current forms and requirements. Students can also access more information on the applicable online community Brightspace page.

Frequently Asked Questions

WHAT IS THE DIFFERENCE BETWEEN A DEGREE OR DIPLOMA EXIT?

Students must apply to graduate whether it is for their degree, diploma, or to have a completed certificate confirmed on their transcripts. It is important for students to [check these important deadlines and add these dates to their personal calendars.](#)

The Diploma exit is an option currently available to students in the professional programs of Diagnostic Medical Ultrasound Technology and Respiratory Therapy. The University may confer a diploma after the student has successfully completed all requirements of the first three years of the program.

The parchment (the document the student receives at convocation) for the diploma clearly indicates that the document is a diploma; there is no mention of a degree.

Students in the professional programs of Diagnostic Medical Ultrasound Technology and Respiratory Therapy are eligible to write their respective certification/registry exams once they have completed the diploma requirements even if they choose to complete the degree. Students must be prepared to pay the examination fee for writing the professional association registration examinations.

Nuclear Medicine Technology and Radiological Technology are degree programs with no option for diploma exit.

The diploma exit is a full exit. Declaring an Intent to Graduate signals that the student intends to leave the program. To register for any 4th year courses, a student who has taken the Diploma exit must apply for re-admission to the BHSc program.

Students who have taken a Diploma exit and who wish to apply for re-admission to complete degree requirements must complete a Dalhousie application form and submit it to the Registrar's Office with the appropriate fee. The Admissions Committee for SHS will make admissions decisions.

Information on the [MRI Certificate program can be found on our School of Health Sciences website.](#)

BACHELOR'S
Degree!

Frequently Asked Questions

AM I INSURED AS A DALHOUSIE STUDENT?

Dalhousie has occupational accident coverage for all students in all faculties that participate in unpaid placements, excluding placements that have mandatory workers compensation coverage. All efforts have been made to align this coverage with worker's compensation coverage as closely as possible.

If a student is injured while participating in an unpaid placement, the student should follow the normal placement site protocol but also contact the Clinical Coordinator at the earliest opportunity so the insurer can be notified. Students still need to maintain their [DSU Health Insurance](#) or equivalent health plan coverage, as the disability insurance does not include health insurance.

NOTE Occupational disability insurance coverage does not apply to international placements.

[Guidelines for Personal Safety in Fieldwork Placements](#)

Students require health insurance for HIV post-exposure prophylaxis in the event of a needle-stick or other similar exposure. Health insurance provided by the Dalhousie Student Union provides this coverage. Students opting out of the DSU insurance should confirm coverage with their own insurance company.

For more information, please see the links below:

[studentvip.ca](#)

[Practicum / Fieldwork Placement Outside of Halifax](#)

[Student Disclosure of Health Information](#)

Students or clinical educators who use their own vehicle while travelling to or from a clinical education activity or event should be aware that there is no automobile coverage provided under Dalhousie's automobile policy.

If a clinical educator or student were driving together during a clinical placement, the driver's automobile insurance policy would respond to an accident claim. They should ensure they have adequate coverage. Dalhousie University recommends anyone using their own vehicle for University business/study carry a minimum liability of \$2 million on their automobile policy.

Note: occupational disability insurance does not apply if a student was injured commuting to or from their clinical placement. It only applies in a motor vehicle accident where the student was required to travel as part of their clinical placement.

Frequently Asked Questions

WHO IS THE FACULTY ADVISOR FOR MY PROGRAM?

- [Diagnostic Medical Ultrasound Technology](#) - Contact: [Sherry Chauder](#)
- [Nuclear Medicine Technology](#) - Contact: [Nichole Bower](#)
- [Radiological Technology](#) - Contact: [Amy Munroe](#)
- [Respiratory Therapy](#) - Contact: [Tammy Scott](#)
- [Magnetic Resonance Imaging Technology Certificate](#) - Contact: [Jennifer Williams](#)

WHEN SHOULD I MEET WITH MY FACULTY ADVISOR?

Students should meet with their faculty advisor when but not limited to the following:

- considering an exceed workload
- a leave of absence
- requesting a letter of permission
- planning for their career goals
- reviewing academic requirements

WHEN SHOULD I MEET WITH THE STUDENT ADVISOR?

Students should meet with the student advisor when but not limited to the following:

- questions regarding accessing Dalhousie University and School of Health Sciences resources
- questions regarding transfer credits
- questions about academic policies and procedures
- if students are not sure who to contact they can start by [contacting the student advisor](#).

WHERE ELSE CAN I TURN FOR ACADEMIC HELP?

The following resources are available to you, and you're encouraged to utilize them fully.

- [Faculty of Health Academic Integrity Website](#): An overview of the academic integrity process, with resources for faculty & students.
- [Dalhousie University Academic Integrity Website](#): Links to policies, definitions, and online tutorials and tips for citations, paraphrasing, and bibliographies.
- [Writing Centre](#): Assistance with writing academic documents, reviewing papers with discipline-specific writing standards, paper organization, structuring an argument, transitions, writing styles, citations, and style guides (Chicago, APA, etc.).
- [Dalhousie Student Advocacy Service \(DSAS\)](#): Assistance with academic appeals and student discipline procedures.
- [The Senate](#): Contact information for Academic Integrity Officers (AIOs), Senate Discipline Committee, Faculty Discipline Procedures, and Academic Discipline Procedures flowchart.

HELP

Frequently Asked Questions

SHOULD I ALWAYS CARRY MY NOVA SCOTIA HEALTH ID WITH ME?

NS Health IDs are issued during registration week and must be worn (visible) at all times when on NS Health property and during clinical learning experiences scheduled in other health care institutions. They do not need to be worn when attending classes on the Dalhousie campus.

NS Health Security regularly performs random checks and if a valid ID is not produced, you may be denied access to hospital grounds/building. Students leaving the program will be required to return their NS Health ID to the Admissions & Program Officer in Room 200 C, Fenwick Medical Centre.

WHAT IS BRIGHTSPACE?

Brightspace is a web-based application designed to complement in-class activities and provide alternative learning methods. Dalhousie instructors use Brightspace to communicate with students, provide course materials, post, receive and grade assignments, collate course grades, and many other services.

Student support for Brightspace is provided by the Help Desk. Phone 902-494-4357 (and press option 1) or 1-800-869-3931, or email support@dal.ca

ARE THERE COMPUTERS ON CAMPUS?

Computers may be found in room 315 at the Fenwick location. Both internet and a networked printer are available. Students must provide their own paper and external data devices.

Students are required to login using their NS Health User ID and password. Please note that these are private and intended for the sole use of the student to which they're assigned.

Computer use at the SHS is governed both by Dalhousie's Guide to Responsible Computing, [found in the University Regulations section of the current Calendar](#), and the [NS Health Computer End-user Acceptable Use Policy](#). The policy ensures computer systems are used for business purposes only serving the interests of the organization and staff, patients, families, and caregivers; maintains system integrity; and protects privacy. Please read the Computer End-User Acceptable Use policy thoroughly.

Students who violate either Dalhousie's Guide to Responsible Computing or NS Health's Computer End-User Acceptable Use policy will be subject to disciplinary action. All activity and internet traffic is closely monitored by NS Health's IT Security.
