Description and Objectives

This course aims to generate a great level of knowledge of one of the most important international organizations since World War II. The United Nation plays a fundamental role to bring long lasting peace and development to a diverse set of countries and nations. We start the course with discussions on the perspectives and historical factors that led to the foundation of the UN. We discuss the UN during and after the Cold War, to demonstrate how strategic interests by powerful States often halt the UN's course of actions. Our discussions then focus on the role the UN has played in promoting development. This is an important objective for the UN, and we examine it in light of key theoretical approaches to development. We finish the course with a discussion on the contemporary issues related to the UN.
