

Mink Research Partnership

Priority Areas of Research

Disease

- Aleutian Disease
- Kit diarrhea
- Foot Pad Necrosis

Genomics

- Disease resistance
- Reproductive efficiency
- Feed utilization and growth

Feeds/Nutrition

- Nutrient requirements for all growth phases
- Alternate protein utilization

Physiology

- Fatty liver causes
- Reproductive hormone management
- Optimal ambient light effects

Management/Environment

- Manure management
- Pest control

Animal Welfare

- Cage Design
- Enrichments
- Health and well being
