

**Request for Proposals (RFP)
The Maritimes' Net-Zero Future:
A Feasibility Study of Hydrogen Production,
Storage, Distribution and Use in The Maritimes**

Deadline: Friday July 3, 2020; 5:00 pm (Atlantic Time)

OERA, in collaboration with Heritage Gas, the Nova Scotia Department of Energy and Mines (NSDEM), the Atlantic Canada Opportunities Agency (ACOA) and Liberty Utilities, is seeking proposals for a feasibility study of hydrogen production, storage, distribution and use in the Maritimes.

Knowledge gaps related to a possible hydrogen future represent a significant impediment to business planners, government regulators and the public at large. This study will provide a broad understanding of the technical and economic constraints and opportunities that hydrogen presents to the Maritimes, with an emphasis on the evolving economic picture over time (2020 – 2050).

This RFP was released on June 17, 2020 and will close on July 3, 2020 at 5 pm Atlantic Daylight Time.

We encourage you to forward this to your contacts who may have an interest in responding.

For full information on the Request for Proposals and how to apply, please [CLICK HERE](#).

Please note, OERA may, at its sole discretion, reject any and all, or parts of any and all, proposals; postpone or cancel at any time this RFP process; waive any minor irregularities in the RFP or the responses received as a result of this RFP.

About OERA

We're an independent non-profit best known for managing research and technology demonstration projects that fulfill rigorous requirements. We work with consortia of academic, government and industry partners to build and share intellectual property related to renewable energy technologies, and cleantech initiatives and geoscience. We're focused on advancing energy sector development and reducing barriers through technical innovation. Our leadership and expertise empower impactful energy research and sustainable resource and economic development in Nova Scotia.
