

## Open House!

Water Quality Laboratory

Friday, May 17th 1 pm - 4 pm

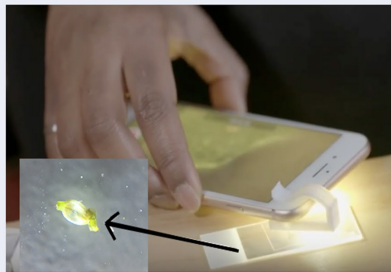

N Bldg - Room 201

See our experimental set-ups and analytical equipment. Discover how processes like coagulation, flocculation and filtration are used to clean water. Learn about distribution system materials such as lead. Attach a 3D printed microscope to your cellphone to capture images from your experience.

TEN DAYS OF  
DISCOVERY &  
INNOVATION

MAY 4 TO 19,  
2019

ALL ACROSS  
CANADA

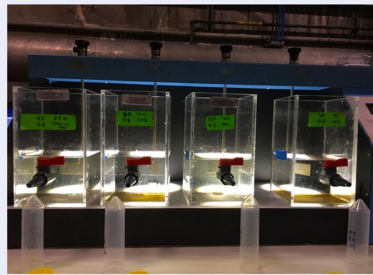

3D Printed Microscope

Cold Climate Research

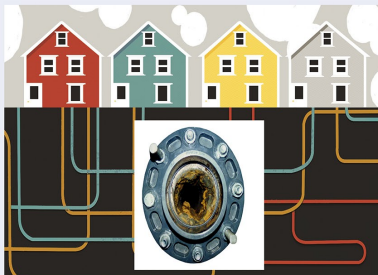

Algal Blooms

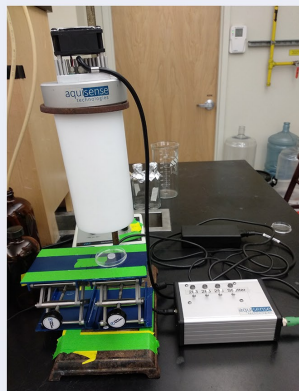

Drinking Water Treatment

Lake Sediment Sampling

Lead Services Lines

UV/LED

Wastewater Treatment
