

## Webinar: February 13, 2020

In order to strengthen the culture of data stewardship in Canada, RDC offers webinars on subjects related to research data management, curation, and preservation.

You are invited to our upcoming webinar:

### **Ethical Digital Data Management: A Toolkit**

Presented by: Chandra Kavanagh, PhD, Ethics Officer, Health Research Ethics Authority

In a world of big data, cloud services, and social media, it can be difficult to know how to keep data safe and secure. In a research environment with a wide variation in terms of technical literacy, the job of managing data gets even harder. In this presentation we will provide you with four simple tools to help Research Ethics Boards (REBs) evaluate the risk level of data and determine if researchers have taken the appropriate steps to ensure their data is appropriately managed throughout its lifecycle, from collection to destruction.
