Quality in Primary Healthcare Seminar Series

Personalized Medicine: The Role of Obesity in Prescribing

Presented by **Dr. Gillian Bartlett,**
Department of Family Medicine,
McGill University

Often when we think of personalized medicine, we think of genes and high tech solutions to complicated problems. In this presentation, Dr. Bartlett will present some of the work her group has done on exploring personalized medicine from the perspective of patient characters that are easily measurable: in this case obesity. Results will be presented from studies that have examined what happens when we ignore the literal elephant in the room – excess weight – and the impact this has for primary care physicians.

Faculty of Medicine
Department of Family Medicine

Wed, Apr 6, 2016
12.15—1.15 pm

Dept. of Family Medicine,
Sunroom,
Abbie J. Lane Bldg., 8th Floor
5909 Veterans' Memorial Lane

We would appreciate hearing from you if you are planning to join us, so that we can make sure we have enough space.

Please reply to the Research Secretary dfmresearch@dal.ca or phone 902-473-4741. We look forward to seeing you there and to building this community of interest together.

Next Event:
Wednesday, May 18th, 2016
12.15—1.15 pm
Abbie J Lane Bldg, 8th Floor

Presenter(s) and topic:
