**Maritime Security Program Workshop**  
**National Shipbuilding Procurement Strategy (NSPS) – Charting the Course**  
**June 6th, 2014**

# ***NOTES***

- This presentation is for information purposes and does not constitute a recommendation to buy or sell products, stocks, or any type of asset.
- The opinions presented here should not be interpreted as the official position of any organization to which the author may be a member.
- To the best of his knowledge, the author does not hold financial interests in the companies discussed in this presentation.
- This presentation does not have a commercial objective.

# ***TODAY***

1. Introduction
2. A challenging context
3. KICs and the NSPS
4. What do we want to be?
5. Some conclusions

# ***CANADA'S DEFENCE INDUSTRY***

- › Relatively large (by Canadian standards)
  - **CA\$12.6 bn** in revenues for **2000 firms**
  
- › A conundrum:
  - A major global exporter (ranked 14th)...
  
  - ...with just **one top 100** global player

# 1. INTRODUCTION

# ***FIRST THINGS FIRST***

The NSPS is **ambitious, wide-ranging** and represents an **essential step** for Canada's **security** as well as for its industrial **competitiveness**.

Government and industry (and academia) must work closely to make Canada a global leader.

As the program for this event notes: “the Auditor General [...] noted that ‘a **gap** appears to be developing between the CFDS level of **ambition**, the evolving naval **capabilities**, and the **budgets**’.”

## **2. A CHALLENGING CONTEXT**

# ***THE WORLD IS NOT STATIC...***

## **Strategic environment**

- **China** 
  - Blue-water navy
  - Territorial claims
  - Arctic
- **Russia** 
  - Expanding sphere of influence (UA, Syria, Egypt, China, BRICS, etc.)
  - Arctic
- **Non-military NATSEC ops**
  - Drug smuggling interdiction (CBSA, CBP)
  - Homeland security (USCG, USN)
- **Anti-piracy** 
- Etc.

## **Industrial environment**

- **General industry trends**
  - COTS
  - Decreasing # of platforms
- **Some shipbuilding trends**
  - The rise of emerging economies
  - Consolidation to cut capacity (e.g. China)
  - The end of go-it-alone?
    - UK and South Korea (MoD Daewoo contract)
    - Australia and South Korea (Daewoo again)
  - Non-traditional Partnerships (French Mistral sale to Russia)

# ***...NOR ARE CANADIAN STRATEGIC ADVANTAGES***

- Canada a niche player while the global industry is highly concentrated (4 players account for 55% of global revenues [IbisWorld, 2014])
- From a hull (limited advantage) to a « floating computer » (excellent position)
- IP development vs revenue potential (incl. int'l)
  - Design?
  - Sustainability
  - Training
  - Technology

# ***KEY ISSUES***

## **Key policies**

- SPA
- Security of supply
- Market-based IRBs

## **Promotion of KICs**

## **Synchronization of KICs and requirements**

## **Making Canadian firms attractive**

### **3. KICs AND THE NSPS**

# ***THE INDUSTRY AT LAST...***

- Before CFDS (2008): **NO** industry in White papers
- DPS and an approach based around Key industrial capabilities (KICs) can help transform the Canadian industry on the global stage
- The difficult question of Industrial Regional Benefits (IRBs)...
- A central issue: How can we benefit from KICs in the NSPS?

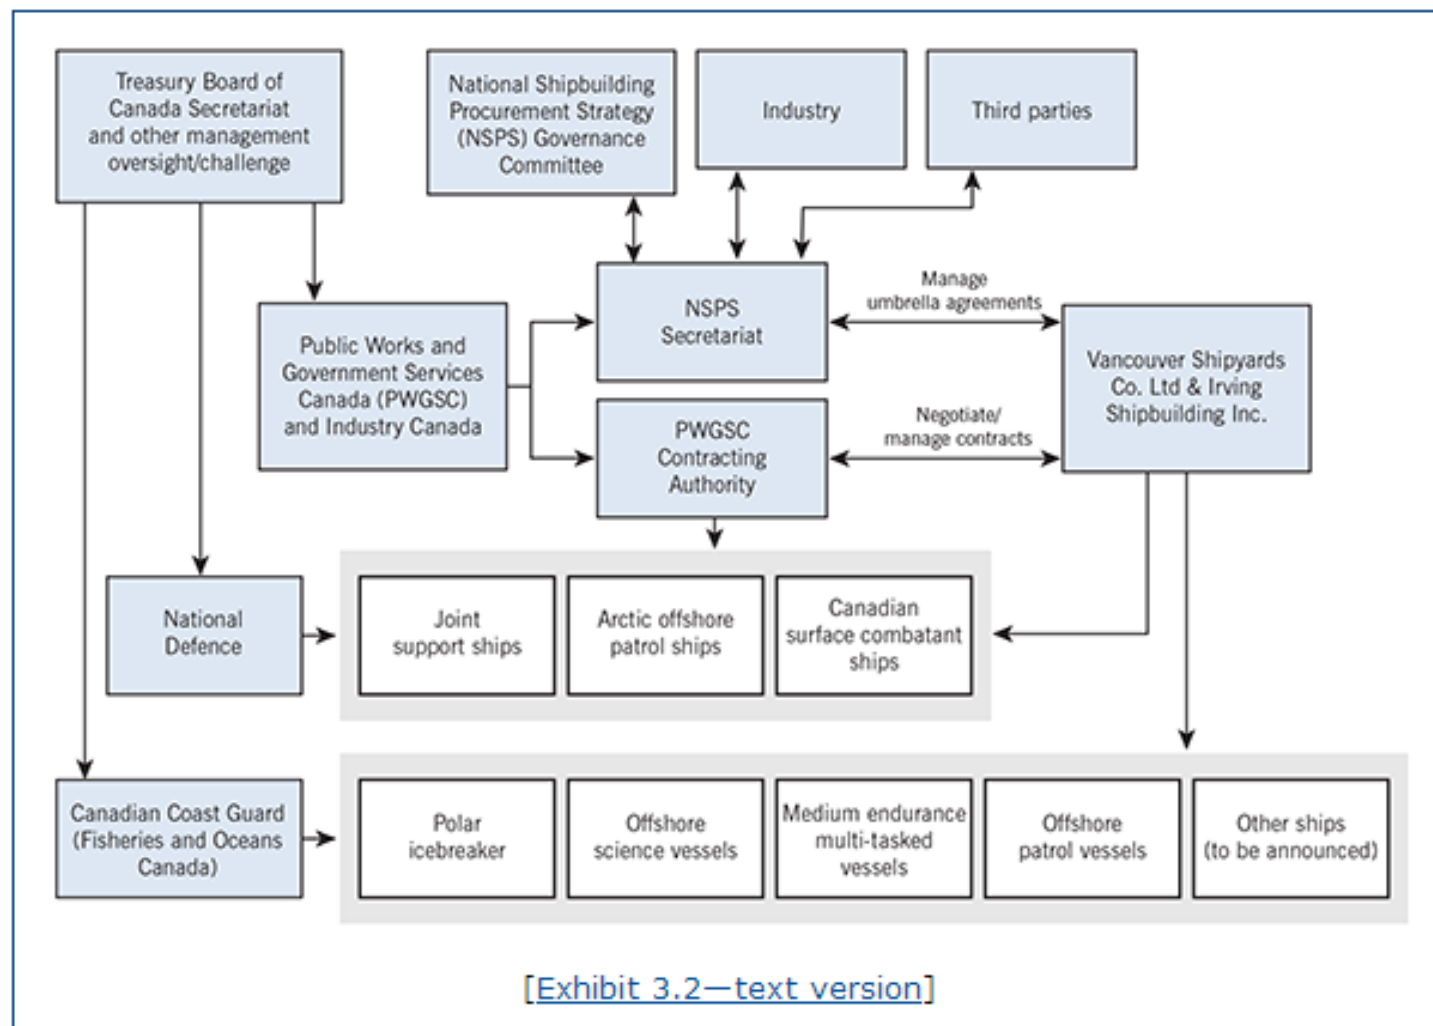

## JENKINS REPORT VS. REVISITED CRITERIA

Jenkins report KICs	Revisited capabilities
<ul style="list-style-type: none"><li>• Arctic and Maritime Security</li><li>• Protecting the Soldier</li><li>• Command and Support</li><li>• Cyber-Security</li><li>• Training Systems</li><li>• In-Service Support</li></ul>	<ul style="list-style-type: none"><li>• Geographic expertise</li><li>• Software integration and computer security</li><li>• Specialized garment making and design</li><li>• Man-machine interaction</li><li>• Process design</li><li>• Situational awareness</li><li>• Experiential learning conception</li><li>• Customer interaction</li></ul>

## Exhibit 3.2—The interrelationships between key entities in the National Shipbuilding Procurement Strategy

Source: OAG, 2013 Fall report

# 4. WHAT DO WE WANT TO BE?

# ***SHAKESPEARIAN DILEMMA***

**A classical national industry**

**OR**

**A global value-added supplier (JSF)**

Sources: KPMG, R&D Review

# **5. SOME CONCLUSIONS TO MOVE AHEAD**

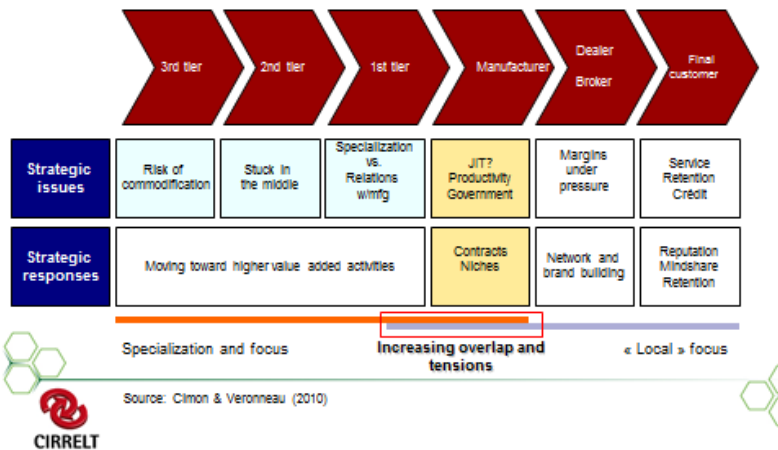

# **(1) SHIFT THE MINDSET**

**e.g. AUTOMOTIVE**

From a « national » value chain...

...to global value networks

## **AN INTEGRATED INDUSTRY - AUTOMOTIVE**

## **SHARED VALUE CREATION**

Buyer-supplier relationships in the auto industry in 2006.

# ***WHAT RESEARCH SAYS***

Summary of network position cost/benefits in the literature

	<b>Primary motivation</b>	<b>Primary consequence</b>
<b>Isolated</b>	- Protection purposes	- Reduced performance
<b>Networked</b>	- Maximization of positional advantage	- Improved performance

Source: Cimon (2011)

## ***(2) INVOLVE STAKEHOLDERS***

- The battle for public opinion
  - F-35
    - Dassault vs Lockheed Martin – over Canadian Content
  - Icebreakers
    - Davie vs. Seaspan – over time-to-deliver and cost savings (\$500M?)
- Develop an engagement strategy
- Proactive PR is a must (see data from Strategic Counsel, 2010):
  - 1/3 of Canadians say CF are getting what they need
  - 1/3 of Canadians say the eqpt is procured on time

Source: Armée de l'air/CBC

Source: CCG

# ***(3) DO SWEAT SCM DETAILS***

- Collaboration w/suppliers
  - E.g. Intel
- Global sourcing
- Efficient pooling of some resources
- QA and supply chain security controls
  - Back door on military grade chips (Skrobogotov, 2012)
  - Pervasiveness of suppliers from emerging countries (PRC)...
- Other issues
  - Counterfeit parts
  - DPRK gold in IBM processors (Globe and Mail, 06/05/14)

# ***(4) FOSTER INNOVATION***

- In products, processes and management techniques.
  - E.g. P&G, paint, Whole Foods
- Challenge the status quo
- Play the value-chain-game
  - Follow the value!!!

**RUAG**

**CGI**

# ***A BALANCING ACT...***

- Industrial policy vs. markets vs. defence
  - DPS and industrial policies: a conundrum
- Access to IP vs. control: what are the necessary strategic gains?
- Old issues, new needs? (Arctic issue and ship acquisition)
- Adapting to the Asian century
- What to share? Cisco in China; Global accounting giants, etc.

POLYTECHNIQUE
